

Emerging Markets Equity Income Fund

OBJECTIVES AND PROCESS

- Seeks long-term capital appreciation and current income.
- Invests at least 80% of its assets in dividend-paying emerging market equity securities (companies tied economically to emerging market countries as defined by the MSCI Emerging Markets Index), across any market cap.
- Uses a top-down and bottom-up strategy to identify companies with sustainable dividend yields and strong earnings growth to construct a portfolio with the potential for maximum portfolio dividend yield within a controlled level of risk.
- The fund may invest:
 - in equity securities, participatory notes, convertible securities, equity linked notes/certificates, depositary receipts and US\$-denominated equities issued by non-US issuers
 - in an aggregate of up to 20% of fund assets both directly and indirectly in China A-shares
 - by using futures/derivatives for hedging or efficient portfolio management purposes
- Seeks to manage towards a low carbon portfolio and targets an overall carbon intensity that is at least 30% lower than that of the MSCI Emerging Markets Index.
- Uses a negative screen to exclude securities issued by companies based on their exposure to ESG risks.

KEY RISKS

Market risk: securities may decline in value due to factors affecting securities markets generally, and equity securities generally have greater price volatility than debt securities.

Smaller company securities risk: securities of companies with smaller market capitalisations tend to be more volatile and less liquid than securities of larger companies.

Emerging market risk: emerging markets may be more sensitive than more mature markets to a variety of economic factors and may be less liquid than markets in the developed world. **ESG risk:** applying an ESG screen for security selection may result in lost opportunity in a security or industry resulting in possible underperformance relative to peers, ESG screens are dependent on third party data and errors in the data may result in the incorrect inclusion or exclusion of a security.
