

U.S. Large Cap Growth Fund

OBJECTIVES AND PROCESS

- Seeks long-term capital appreciation.
- Invests at least two-thirds of its assets in equity securities of US large-capitalisation companies.
- Seeks to identify companies with potential for capital growth, improving sales, effective management and a competitive advantage, taking a surround-the-company approach.
- The fund may invest:
 - principally in equity securities of approximately 30 to 40 large-cap companies (within the Russell 1000 Index market-cap range at the time of purchase)
 - up to 25% of total assets in equity securities of non-US issuers through ADRs, CDRs, EDRs, GDRs, IDRs and similar or US\$-denominated equities of non-US issuers
 - by using futures/derivatives for hedging or efficient portfolio management purposes

KEY RISKS

Market risk: securities may decline in value due to factors affecting securities markets generally, and equity securities generally have greater price volatility than debt securities.

Geographic concentration risk: investments concentrated in specific geographic regions and markets may be subject to greater volatility due to economic downturns and other factors affecting the specific geographic regions.
