

Allspring Special International Small Cap CIT

Unit class/CUSIP: E2: 01988T100

Asset class: International Equity

OBJECTIVE

The Fund seeks to achieve long-term capital appreciation.

FUND STRATEGY

The Fund invests principally in equity securities of small-capitalization companies of foreign issuers, which the Manager defines as companies with market capitalizations within the range of the MSCI World ex-U.S. Small Cap Index at the time of purchase. The Manager considers foreign securities to be securities: (1) issued by companies with their principal place of business or principal office or both, as determined in their reasonable discretion, in a country other than the U.S.; or (2) issued by companies for which the principal securities trading market is a country other than the U.S.; (3) or any companies held within the MSCI World ex-U.S. Small Cap Index.

Sector allocation (%)

	Communication services	Consumer discretionary	Consumer staples	Energy	Financials	Health care	Industrials	Information technology	Materials	Real estate	Utilities	Other
Fund	0.46	7.98	13.45	3.36	7.98	3.33	29.15	12.58	11.38	5.55	0.00	0.48
Index	3.71	12.24	5.63	4.60	12.10	5.29	22.44	9.10	11.10	10.70	3.08	—
Allocation variance	-3.25	-4.26	7.82	-1.24	-4.12	-1.96	6.71	3.48	0.28	-5.15	-3.08	—

Sector allocations are as of the date specified above and subject to change without notice. Fund and index sums may not add up to exactly 100% due to rounding. Excludes any cash or cash equivalents that may be held by the fund.

Geographic allocation (%)

Geographic allocation is subject to change and may have changed since the date specified. Percent total may not add to 100% due to rounding and/or excluding cash and cash equivalents held by the fund.

Past performance is no guarantee of future results. Current performance may be higher or lower than that quoted. Investment return and principal value will fluctuate so that units, when redeemed, may be worth more or less than their original costs. Index returns are for illustrative purposes only. Performance for other unit classes will differ due to different fee structures and other factors. All values are unaudited and subject to revision. All income is reinvested in the Fund and reflected in the unit value. Fund returns are reported net of the annual fund expenses, primarily including audit, custody, fund accounting and investment advisory expenses, charged to the Fund, but does not include the potential impact of taxes applicable to an investment in the fund. All investing involves risk, including the possible loss of principal. Benchmarks are provided for illustrative purposes only. Comparisons to benchmarks have limitations because benchmarks have volatility and other material characteristics that may differ from those of the funds. Because of these differences, benchmarks should not be relied upon as an accurate measure of comparison. The performance shown is compared to a broad-based securities market index. Broad-based securities indices are unmanaged and are not subject to fees and expenses typically associated with investment products.

SEI Trust Company (the "Trustee") serves as the Trustee of the Fund and maintains ultimate fiduciary authority over the management of, and the investments made, in the Fund. The Fund is part of a Collective Investment Trust (the "Trust") operated by the Trustee. The Trustee is a trust company organized under the laws of the Commonwealth of Pennsylvania and wholly owned subsidiary of SEI Investments Company (SEI). The Trust is not a mutual fund, as defined under the investment company act of 1940, as amended.

Definitions:

Price/Earnings (P/E) is the price of a share of a stock divided by earnings per share, usually calculated using the latest year's earnings.

Price/Book (P/B) is the ratio used to compare a stock's market value with its book value. It is calculated by dividing the current closing price of the stock by the latest quarter's book value per share.

Median Market Cap is the midpoint of market capitalization (market price multiplied by the number of shares outstanding) of the stocks in a portfolio. Half the stocks in the portfolio will have higher market capitalizations; half will have lower.

5-year earnings growth rate of a fund is the weighted median of the annualized rate of earnings-per-share growth over the trailing five-year period for the stocks held within a fund.

Risks:

Stock values fluctuate in response to the activities of individual companies and general market and economic conditions. Foreign investments are especially volatile and can rise or fall dramatically due to differences in the political and economic conditions of the host country. These risks are generally intensified in emerging markets. The use of derivatives may reduce returns and/or increase volatility. Certain investment strategies tend to increase the total risk of an investment (relative to the broader market). This fund is exposed to smaller-company securities risk.

1. The Morgan Stanley Capital International (MSCI) World ex-USA Small Cap (Net) Index captures small cap representation across 22 of 23 Developed Markets countries. With 2,504 constituents, the index covers approximately 14% of the free float-adjusted market capitalization in each country. You cannot invest directly in an index. Source: MSCI.
