

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Allspring (Lux) Worldwide Fund - U.S. Short-Term High Yield Bond Fund,
a sub-fund of Allspring (Lux) Worldwide Fund
Class I (GBP) Shares - distr. (hedged) (LU0944313799)
Management Company: Allspring Global Investments Luxembourg S.A.

Objectives and Investment Policy

The fund seeks total return, consisting of a high level of current income and capital appreciation by investing, under normal market conditions, at least two-thirds of its total assets in corporate debt securities that are below-investment-grade (i.e., rated lower than Baa by Moody's or lower than BBB by Standard & Poor's or, if unrated, determined to be of comparable quality by the fund), at least 75% of its total assets in debt securities of U.S. issuers, up to 25% of its total assets in U.S. dollar-denominated debt securities of non-U.S. issuers, and up to 20% of its total assets in asset-backed securities. U. S. debt securities are securities: (1) issued by companies with their principal office in the United States or exercising a predominant part of their economic activities in the United States; or (2) issued by U. S. governmental issuers.

The fund invests principally in below-investment-grade debt securities (often called "high yield" securities or "junk bonds") of U.S. corporate issuers that are rated BB through B by Standard & Poor's or Ba through B by Moody's or an equivalent quality rating from another U.S. nationally recognized statistical ratings organization, or are deemed by the fund to be of comparable quality. While the fund may purchase securities of any maturity, under normal circumstances, its U.S. dollar-weighted average effective maturity is expected to be three years or less.

The fund may also use futures, forward contracts, options or swap agreements, as well as other derivatives, for hedging, efficient portfolio management or investment purposes.

The fund focuses on selecting individual securities that may potentially add value from income and/or capital appreciation, primarily using a bottom-up fundamental credit analysis to generate new ideas and to understand the potential risks.

This share class will seek to be 100% hedged against the base currency of the fund with the objective of minimising currency risk exposure. It may not be possible to always hedge the class 100% against fluctuations of the reference currency.

This share class intends to distribute dividends net of expenses monthly.

You may sell your shares on each business day when banks in Luxembourg are open for normal business and the New York Stock Exchange is open for trading (a "Business Day").

The fund is actively managed and not managed in reference to a benchmark.

Risk and Reward Profile

This rating system is based on the volatility of the fund's returns over the past 5 years. Please note past returns may not be a reliable indicator of the future risk and reward profile of the fund; the rating may change over time based on future returns; and category 1 does not mean a risk-free investment.

Lower Risk			Higher Risk			
< Typically Lower Rewards			Typically Higher Rewards >			
1	2	3	4	5	6	7

The class is in category 4 because the average amount returns varied each year over the past 5 years was equal to or above 5.0% and less than 10.0%.

The following additional risks may impact the fund's returns:

Counter-Party Risk - The fund may incur a loss if the other party to an investment contract, such as a repurchase or reverse repurchase agreement or certain derivative contracts, fails to fulfill its contractual obligation to the fund.

Debt Securities Risk - The issuer of a debt security may fail to pay interest or principal when due, and changes in market interest rates may reduce the value of debt securities or reduce the fund's returns.

Derivatives Risk - The use of derivatives such as futures, options and swap agreements, can lead to losses, including those magnified by leverage, particularly when derivatives are used to enhance return rather than offset risk. In addition, there may be an absence of a liquid market for any particular instrument at any particular time.

High Yield Securities Risk - High yield securities, i.e. "junk bonds," are debt securities that are rated below-investment-grade, are unrated and deemed by the fund to be below-investment-grade, or are in default at the time of purchase. These securities have much greater risk of default or of not returning principal and tend to be more volatile and less liquid than higher-rated securities of similar maturity.

The fund may not achieve its objective and/or you could lose money on your investment in the fund. For more information about the fund's risks, please see "Risks" and "Risk Management Processes" in the prospectus, which is available at allspringglobal.com.

Charges for this Fund

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distribution. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry Charge	None
Exit Charge	None
This is the maximum that might be taken out of your money before it is invested.	

Charges taken from the fund over a year	
Ongoing Charges	0.65%
Charges taken from the fund under certain specific conditions	
Performance Fee	None

The **entry** and **exit charges** shown are the highest possible charges you would pay. Please consult your advisor or distributor to find out your actual charges, which might be less. The **ongoing charges** reflect the total expense ratio cap put in place by the Investment Manager. Any costs that would cause this cap to be exceeded will be absorbed by the Investment Manager.

The annual report for each financial year will include details on the effective charges made. **Ongoing charges** may vary from year to year. The **ongoing charges** do not include the portfolio transaction costs, except in the case of an entry/exit charge paid by the fund when buying or selling units in another collective investment undertaking.

For more information about the fund's charges, please see "Fees and Expenses" in the prospectus.

Past Performance

Past performance is not a guide to future performance. Performance calculations are based on the net asset value, include ongoing charges but exclude entry and exit charges, if any, and are calculated in GBP with income reinvested. The base currency of the fund is USD.

Fund launch date: 2012. Share Class launch date: 2013.
