What is this product?

Type	Allspring (Lux) Worldwide Fund (the "Fund") is a Societe d'Investissement à Capital Variable (SICAV) composed of several separate sub-funds organised under the laws of Luxembourg.
Term	The Fund has been established for an indefinite period of time. The PRIIP Manufacturer reserves the right to liquidate the Fund, subject to approval by the Board of Directors.
Objectives	<p>Allspring (Lux) Worldwide Fund - Global Small Cap Equity Fund (the "Sub-Fund") seeks long-term capital appreciation by investing at least two-thirds of its total assets in equity securities of small capitalisation companies located worldwide (currently considered to be companies with market capitalisations within the market capitalisation range of the MSCI World Small Cap Index at the time of purchase). The Sub-Fund will invest in no fewer than three countries, which may include the United States and may invest more than 25% of its total assets in any one country and up to 10% of its total assets in emerging market equity securities. Emerging market equity securities are securities issued by companies that are traded in, have their primary operations in, are domiciled in or derive a majority of their revenue from emerging market countries as defined by the MSCI Emerging Markets Index.</p> <p>The Sub-Fund may use futures, forward contracts, options, or swap agreements, as well as other derivatives, for hedging or efficient portfolio management purposes. The Sub-Fund may hedge the portfolio's foreign currency exposure by purchasing or selling currency futures and foreign currency forward contracts. However, under normal circumstances, the Sub-Fund will not engage in extensive foreign currency hedging.</p> <p>The Sub-Fund promotes environmental and/or social characteristics but does not have a sustainable investment objective. Through the use of a negative screening process, the Sub-Fund seeks to exclude certain securities in accordance with its exclusion policy. A copy of the methodology and list of excluded investments (including the revenue thresholds) is available under allspringglobal.com. Shareholders may also request a copy from the Fund or the Management Company. The Sub-Fund utilises both fundamentally based, bottom-up techniques and top-down, industry and sector analysis to identify global opportunities in companies that are well managed, have flexible balance sheets, sustainable cash flows and that the Sub-Fund believes to be undervalued relative to their intrinsic value. The Sub-Fund will invest at least 64% of its assets in companies with strong environmental, social and governance ("ESG") scores as determined by its proprietary scoring system or that are showing a positive directional trend as measured by its qualitative work and proprietary scoring system. The Sub-Fund is actively managed but uses the MSCI Emerging Markets Index and the MSCI World Small Cap Index as references for selecting investments and the MSCI World Small Cap Index for performance comparison.</p> <p>You may redeem your investment upon demand on each business day when banks in Luxembourg are open for normal business and the New York Stock Exchange is open for trading (a "Business Day").</p> <p>This share class does not distribute dividends. Income is reinvested in the Sub-Fund.</p>
Depository	Brown Brothers Harriman (Luxembourg) S.C.A.
Additional information	This document describes a share class of a sub-fund of Allspring (Lux) Worldwide Fund. The assets and liabilities of each sub-fund are segregated and no sub-fund is responsible for the liabilities of another. Price Publication: Net asset value per share is calculated on each Business Day and is available in local media and/or with the Fund's local agent in certain countries and at the registered office of the Fund.
Intended investor	This product is intended for institutional investors of all knowledge and/or experience levels who are prepared to experience higher levels of volatility in pursuit of higher returns, who have an investment horizon of 5 years or longer and who have a risk tolerance compatible with the product's SRI rating.

What are the risks and what could I get in return?

Summary risk indicator

← Lower risk

Higher risk →

The risk indicator assumes you keep the product for 5 years.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. We have classified this product as 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level; and poor market conditions are very unlikely to impact the capacity of the Sub-Fund to pay you. **Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.**

Performance scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product / a suitable benchmark over the last 10 years. The scenarios shown are illustrations based on results from the past and on certain assumptions. Markets could develop very differently in the future.

What happens if Allspring Global Investments Luxembourg S.A. is unable to pay out?

The value of your investment would not be affected by a default by the PRIIP Manufacturer. The value of your investment is not guaranteed but you will not face financial loss greater than the amount of your investment.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods. We have assumed: in 2025 you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
