What is this product?

Type	Allspring (Lux) Worldwide Fund (the "Fund") is a Societe d'Investissement à Capital Variable (SICAV) composed of several separate sub-funds organised under the laws of Luxembourg.
Term	The Fund has been established for an indefinite period of time. The PRIIP Manufacturer reserves the right to liquidate the Fund, subject to approval by the Board of Directors.
Objectives	<p>Allspring (Lux) Worldwide Fund - USD Investment Grade Credit Fund (the "Sub-Fund") seeks total return, maximizing investment income while preserving capital, by investing, under normal circumstances, at least two-thirds of its total assets in US Dollar-denominated credit debt securities rated investment grade (i.e., Baa or higher by Moody's or BBB or higher by Standard & Poor's) at the time of purchase. The Sub-Fund will hold United States corporate debt securities, Yankee bond debt securities, agencies, Supranationals and US Dollar-denominated sovereign bonds. The Sub-Fund promotes environmental and/or social characteristics but does not have a sustainable investment objective.</p> <p>The Sub-Fund invests up to one-third of its total assets in debt securities rated below investment grade at the time of purchase and non-US Dollar-denominated debt securities as well as foreign agencies, taxable municipals, asset-backed securities and commercial mortgage-backed securities.</p> <p>The Sub-Fund may invest up to 20% of its total assets in asset-backed securities, including mortgage-backed securities.</p> <p>The Sub-Fund may invest up to 5% of its total assets in contingent convertible bonds.</p> <p>The Sub-Fund will utilise the Allspring ESGiQ (ESG Information Quotient), a proprietary rating system created to assess ESG risk and materiality. The ESGiQ overall score assigns an overall rating for corporate issuers on a scale of 1 to 5, whereby 2 through 1- reflects low or lagging ESG issuers and 3+ through 5+ reflects high or leading ESG issuers. Sovereign issuers are assigned a quantitative rating on a scale of 1-10 whereby 1 through 4 reflects low or lagging issuers and 6 through 10 reflects high or leading ESG issuers. The Sub-Fund will invest at least two-thirds of its total assets in securities which have ESGiQ ratings that reflect high or leading ESG issuers and will exclude low or lagging ESG issuers. Municipal securities, cash, derivatives and investments in underlying funds will not be required to have an ESGiQ score.</p> <p>Through the use of a negative screening process, the Sub-Fund seeks to exclude certain securities in accordance with its exclusion policy. A copy of the methodology and list of excluded investments (including the revenue thresholds) is available under allspringglobal.com. Shareholders may also request a copy from the Fund or the Management Company.</p> <p>The Sub-Fund may use futures, forward contracts, and options or swap agreements, as well as other derivatives, for hedging, efficient portfolio management or investment purposes.</p> <p>The Sub-Fund is actively managed but uses the Bloomberg U.S. Credit Index for performance comparison. The investments of the Sub-Fund may deviate significantly from the components of and their respective weightings in the benchmark.</p> <p>You may redeem your investment upon demand on each business day when banks in Luxembourg are open for normal business and the New York Stock Exchange is open for trading (a "Business Day").</p> <p>This share class intends to distribute dividends net of expenses monthly.</p> <p>This share class will seek to be 100% hedged against the base currency of the Sub-Fund with the objective of minimising currency risk exposure. It may not be possible to always hedge the class 100% against fluctuations of the reference currency.</p>
Depository	Brown Brothers Harriman (Luxembourg) S.C.A.

What are the risks and what could I get in return?

Summary risk indicator

← Lower risk

Higher risk →

The risk indicator assumes you keep the product for 5 years.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. We have classified this product as 3 out of 7, which is a medium low risk class. This rates the potential losses from future performance at a medium low level; and poor market conditions are very unlikely to impact the capacity of the Sub-Fund to pay you. **Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.**

Performance scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product / a suitable benchmark over the last 10 years. The scenarios shown are illustrations based on results from the past and on certain assumptions. Markets could develop very differently in the future.

What happens if Allspring Global Investments Luxembourg S.A. is unable to pay out?

The value of your investment would not be affected by a default by the PRIIP Manufacturer. The value of your investment is not guaranteed but you will not face financial loss greater than the amount of your investment.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods. We have assumed: in 2025 you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
