What is this product?

Type	Allspring (Lux) Worldwide Fund (the "Fund") is a Societe d'Investissement à Capital Variable (SICAV) composed of several separate sub-funds organised under the laws of Luxembourg.
Term	The Fund has been established for an indefinite period of time. The PRIIP Manufacturer reserves the right to liquidate the Fund, subject to approval by the Board of Directors.
Objectives	<p>Allspring (Lux) Worldwide Fund - U.S. Short-Term High Yield Bond Fund (the "Sub-Fund") seeks total return, consisting of a high level of current income and capital appreciation by investing, under normal market conditions, at least two-thirds of its total assets in corporate debt securities that are below-investment-grade (i.e., rated lower than Baa by Moody's or lower than BBB by Standard & Poor's or, if unrated, determined to be of comparable quality by the Sub-Fund), at least 75% of its total assets in debt securities of U.S. issuers, up to 25% of its total assets in U.S. dollar-denominated debt securities of non-U.S. issuers, and up to 20% of its total assets in asset-backed securities. U. S. debt securities are securities: (1) issued by companies with their principal office in the United States or exercising a predominant part of their economic activities in the United States; or (2) issued by U.S. governmental issuers. The Sub-Fund invests principally in below-investment-grade debt securities (often called "high yield" securities or "junk bonds") of U.S. corporate issuers that are rated BB through B by Standard & Poor's or Ba through B by Moody's or an equivalent quality rating from another U.S. nationally recognized statistical ratings organization, or are deemed by the Sub-Fund to be of comparable quality. While the Sub-Fund may purchase securities of any maturity, under normal circumstances, its U.S. dollar-weighted average effective maturity is expected to be three years or less.</p> <p>The Sub-Fund may also use futures, forward contracts, options or swap agreements, as well as other derivatives, for hedging, efficient portfolio management or investment purposes.</p> <p>The Sub-Fund focuses on selecting individual securities that may potentially add value from income and/or capital appreciation, primarily using a bottom-up fundamental credit analysis to generate new ideas and to understand the potential risks.</p> <p>You may redeem your investment upon demand on each business day when banks in Luxembourg are open for normal business and the New York Stock Exchange is open for trading (a "Business Day").</p> <p>This share class does not distribute dividends. Income is reinvested in the Sub-Fund.</p>
Depository	Brown Brothers Harriman (Luxembourg) S.C.A.
Additional information	<p>This document describes a share class of a sub-fund of Allspring (Lux) Worldwide Fund. The assets and liabilities of each sub-fund are segregated and no sub-fund is responsible for the liabilities of another. The prospectus and financial reports are prepared for Allspring (Lux) Worldwide Fund as a whole. You may obtain free copies of these documents in English, French, and German from Allspring (Lux) Worldwide Fund, c/o Brown Brothers Harriman (Luxembourg) S.C.A., 80 Route d'Esch, L-1470 Luxembourg or at allspringglobal.com. Price Publication: Net asset value per share is calculated on each Business Day and is available in local media and/or with the Fund's local agent in certain countries and at the registered office of the Fund.</p>
Intended investor	<p>This product is intended for investors of all knowledge and/or experience levels who are prepared to experience higher levels of volatility in pursuit of higher returns, who have an investment horizon of 3 years or longer and who have a risk tolerance compatible with the product's SRI rating.</p>

What are the risks and what could I get in return?

Summary risk indicator

← Lower risk

Higher risk →

The risk indicator assumes you keep the product for 3 years.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. We have classified this product as 2 out of 7, which is a low risk class. This rates the potential losses from future performance at a low level; and poor market conditions are very unlikely to impact the capacity of the Sub-Fund to pay you. **Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.**

Performance scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product / a suitable benchmark over the last 8 years. The scenarios shown are illustrations based on results from the past and on certain assumptions. Markets could develop very differently in the future.

What happens if Allspring Global Investments Luxembourg S.A. is unable to pay out?

The value of your investment would not be affected by a default by the PRIIP Manufacturer. The value of your investment is not guaranteed but you will not face financial loss greater than the amount of your investment.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods. We have assumed: in 2025 you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.

Investment USD 10,000		
Scenarios	If you exit after 1 year	If you exit after 3 years
Total costs	628 USD	952 USD
Annual cost impact(*)	6.3 %	3.0 %

(*) This illustrates how costs reduce your return each year over the holding period. For example, it shows that if you exit at maturity your average return per year is projected to be 5.4% before costs and 2.3% after costs.
