What is this product?

Type	Allspring (Lux) Worldwide Fund (the "Fund") is a Societe d'Investissement à Capital Variable (SICAV) composed of several separate sub-funds organised under the laws of Luxembourg.
Term	The Fund has been established for an indefinite period of time. The PRIIP Manufacturer reserves the right to liquidate the Fund, subject to approval by the Board of Directors.

Allspring (Lux) Worldwide Fund - Emerging Markets Equity Advantage Fund (the "Sub-Fund") seeks long-term capital appreciation and current income by investing, under normal market conditions, at least 80% of its net assets in dividend-paying emerging market equity securities across any market capitalisations. Equity exposure is achieved directly through investment in equity securities and/or indirectly through participatory notes, convertible securities, equity linked notes and/or certificates. The Sub-Fund may also invest in equity securities through ADRs, CDRs, EDRs, GDRs, IDRs and similar depositary receipts as well as equities denominated in U.S. dollars issued by non-U.S. issuers. The Sub-Fund promotes environmental and/or social characteristics but does not have a sustainable investment objective. Emerging market equity securities are securities issued by companies that are traded in, have their primary operations in, are domiciled in or derive a majority of their revenue from emerging market countries as defined by the MSCI Emerging Markets Index. The Sub-Fund may invest up to an aggregate of 20% of its net assets both directly and indirectly in equity securities of Chinese companies listed on the Shanghai Stock Exchange or Shenzhen Stock Exchange (commonly known as China A shares). Equity securities of Chinese companies are securities issued by companies with their registered offices in the People's Republic of China or exercising a predominant part of their economic activities in the People's Republic of China.

The Sub-Fund may use futures, forward contracts, options or swap agreements, as well as other derivatives, for hedging or efficient portfolio management purposes. The Sub-Fund may hedge the portfolio's foreign currency exposure by purchasing or selling currency futures and foreign currency forward contracts. However, under normal circumstances, the Sub-Fund will not engage in extensive foreign currency hedging.

Objectives

The Sub-Fund's investment strategy includes both a top-down strategy, which takes account of overall economic and market trends in each country, and a bottom-up strategy, in which the Sub-Fund uses fundamental research for security selection. The Sub-Fund seeks to manage towards a low carbon portfolio and targets an overall carbon intensity that is at least 30% lower than that of the MSCI Emerging Markets Index. The Sub-Fund focuses on companies where the potential return is determined to be in excess of the Sub-Fund's estimation of equity value at risk from material ESG factors by investing at least 64% of its net assets in companies that it believes are capable of managing both ESG and operational risks through responsible practices on material ESG issues or companies that it believes have the potential for improving their operational and ESG profiles over time. Through the use of a negative screening process, the Sub-Fund seeks to exclude certain securities in accordance with its exclusion policy. A copy of the methodology and list of excluded investments (including the revenue thresholds) is available under [allspringglobal.com](https://www.allspringglobal.com). Shareholders may also request a copy from the Fund or the Management Company. The Sub-Fund is actively managed but uses the MSCI Emerging Markets Index as a reference for selecting investments and for performance comparison. The investments of the Sub-Fund may deviate significantly from the components of and their respective weightings in the benchmark.

You may redeem your investment upon demand on each business day when banks in Luxembourg are open for normal business and the New York Stock Exchange is open for trading (a "Business Day").

This share class intends to distribute dividends gross of expenses quarterly.

Depository	Brown Brothers Harriman (Luxembourg) S.C.A.

What are the risks and what could I get in return?

Summary risk indicator

← Lower risk Higher risk →

The risk indicator assumes you keep the product for 5 years.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. We have classified this product as 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level; and poor market conditions are very unlikely to impact the capacity of the Sub-Fund to pay you.

Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Performance scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product / a suitable benchmark over the last 10 years. The scenarios shown are illustrations based on results from the past and on certain assumptions. Markets could develop very differently in the future.

What happens if Allspring Global Investments Luxembourg S.A. is unable to pay out?

The value of your investment would not be affected by a default by the PRIIP Manufacturer. The value of your investment is not guaranteed but you will not face financial loss greater than the amount of your investment.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods. We have assumed: in 2026 you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
