Shareholders are not charged the sales charge differential when exchanging from a Class A fund with a lower sales charge to a Class A fund with a higher sales charge. Class A share exchanges will not trigger a CDSC. The new shares received in the exchange will continue to age according to the original shares' CDSC schedule and will be charged the CDSC applicable to the original shares upon redemption.

1. A contingent deferred sales charge (CDSC) of 1.00% will be charged if redeemed within 18 months from the date of purchase.

2. The dealer commission on purchases at or above this breakpoint is inclusive of an advance of the first year's 0.25% dealer trail. Monthly dealer trail payments will resume in the 13th month after purchase.

3. The dealer commission will be paid at a rate of 1.00% of first \$2.5 million, plus 0.75% of next \$2.5 million, plus 0.50% of any amount over \$5 million.

4. A contingent deferred sales charge (CDSC) of 0.50% will be charged if redeemed within 12 months from the date of purchase.

5. A contingent deferred sales charge (CDSC) of 0.40% will be charged if redeemed within 12 months from the date of purchase.

Investing involves risk, including the possible loss of principal. Stock values fluctuate in response to the activities of individual companies and general market and economic conditions. Bond values fluctuate in response to the financial condition of individual issuers, general market and economic conditions, and changes in interest rates. Changes in market conditions and government policies may lead to periods of heightened volatility in the bond market and reduced liquidity for certain bonds held by the fund. In general, when interest rates rise, bond values fall and investors may lose principal value. Interest rate changes and their impact on the fund and its share price can be sudden and unpredictable. Some funds, including nondiversified funds and funds investing in foreign investments, high-yield bonds, small- and mid-cap stocks, and/or more volatile segments of the economy, entail additional risk and may not be appropriate for all investors. A portion of a fund's income may be subject to federal, state, and/or local income taxes or the alternative minimum tax (AMT). Any capital gains distributions may be taxable. The U.S. government guarantee applies to certain underlying securities and not to shares of the Adjustable Rate Government Fund or Short Duration Government Fund. Consult a fund's prospectus for additional information on these and other risks.

*Carefully consider a fund's investment objectives, risks, charges, and expenses before investing. For a current prospectus and, if available, a summary prospectus, containing this and other information, call your investment professional or visit allspringglobal.com. Read it carefully before investing.*
