Before you invest, you may want to review the Fund's prospectus, which contains more information about the Fund and its risks. You can find the Fund's prospectus, reports to shareholders and other information about the Fund online at allspringglobal.com/reports. You can also get information at no cost by calling 1-800-222-8222, or by sending an email request to fundliterature@allspring-global.com. The current prospectus ("Prospectus") and statement of additional information ("SAI"), dated February 1, 2024, as supplemented from time to time, are incorporated by reference into this summary prospectus. The Fund's SAI may be obtained, free of charge, in the same manner as the Prospectus.

Investment Objective

The Fund seeks long-term capital appreciation.

Fees and Expenses

These tables are intended to help you understand the various costs and expenses you will pay if you buy, hold and sell shares of the Fund.

Shareholder Fees (fees paid directly from your investment)

Maximum sales charge (load) imposed on purchases (as a percentage of offering price)	None
Maximum deferred sales charge (load) (as a percentage of offering price)	None

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)

Management Fees	0.78%
Distribution (12b-1) Fees	0.00%
Other Expenses	0.06%
Acquired Fund Fees and Expenses	0.01%
Total Annual Fund Operating Expenses	0.85%
Fee Waivers	(0.01)%
Total Annual Fund Operating Expenses After Fee Waivers¹	0.84%

1. The Manager has contractually committed through January 31, 2025, to waive fees and/or reimburse expenses to the extent necessary to cap Total Annual Fund Operating Expenses After Fee Waiver at 0.83% for Class R6. Brokerage commissions, stamp duty fees, interest, taxes, acquired fund fees and expenses (if any), and extraordinary expenses are excluded from the expense cap. Prior to or after the commitment expiration date, the cap may be increased or the commitment to maintain the cap may be terminated only with the approval of the Board of Trustees.

Example of Expenses

The example below is intended to help you compare the costs of investing in the Fund with the costs of investing in other funds. The example assumes a \$10,000 initial investment, 5% annual total return, and that fees and expenses remain the same as in the tables above. To the extent that the Manager is waiving fees or reimbursing expenses, the example assumes that such waiver or reimbursement will only be in place through the date noted above. Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

After:	
1 Year	\$86
3 Years	\$270
5 Years	\$470
10 Years	\$1,048

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 36% of the average value of its portfolio.

Principal Investment Strategies

Under normal circumstances, we invest:

- at least 80% of the Fund’s net assets in common stocks; and
- up to 25% of the Fund’s total assets in equity securities of foreign issuers, including ADRs and similar investments.

We invest principally in common stocks of small-and medium-capitalization domestic and foreign companies, which we define as those with market capitalizations falling within the ranges of the Russell 2000® Index and the Russell Midcap® Index at the time of purchase. The ranges of the Russell 2000® Index and the Russell Midcap® Index were approximately \$10 million to \$15.15 billion and \$270 million to \$73.29 billion, respectively, as of December 31, 2023, and are expected to change frequently.

We invest principally in common stocks of small-and medium-capitalization companies that we believe are underpriced yet have attractive growth prospects. Our analysis is based on the determination of a company’s “private market valuation,” which is the price an investor would be willing to pay for the entire company. We determine a company’s private market valuation based upon several different types of analysis. We carry out a fundamental analysis of a company’s cash flows, asset valuations, competitive factors, and other industry specific factors. We also gauge the company’s management strength, financial health, and growth potential in determining a company’s private market valuation. We place an emphasis on company management, even meeting with management in certain situations. Finally, we focus on the long-term strategic direction of the company. We then compare the private market valuation as determined by these factors to the company’s public market valuation, and invest in the securities of those companies where we believe there is a significant gap between the two. As part of our investment process, an assessment of environmental, social and governance (ESG) factors that are deemed to have material business and/or financial risk may be considered alongside other relevant factors. The ESG factors utilized in the Fund’s investment process may change over time, some factors may not be relevant with respect to all stocks and may or may not be determinative in the security selection process.

We may sell an investment when its price no longer compares favorably with the company’s private market valuation. In addition, we may choose to sell an investment where the fundamentals deteriorate or the strategy of the management or the management itself changes.

Principal Investment Risks

An investment in the Fund may lose money, is not a deposit of a bank or its affiliates, is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other governmental agency, and is primarily subject to the risks briefly summarized below.

Market Risk. The values of, and/or the income generated by, securities held by the Fund may decline due to general market conditions or other factors, including those directly involving the issuers of such securities. Securities markets are volatile and may decline significantly in response to adverse issuer, regulatory, political, or economic developments. Different sectors of the market and different security types may react differently to such developments.

Equity Securities Risk. The values of equity securities may experience periods of substantial price volatility and may decline significantly over short time periods. In general, the values of equity securities are more volatile than those of debt securities. Equity securities fluctuate in value and price in response to factors specific to the issuer of the security, such as management performance, financial condition, and market demand for the issuer’s products or services, as well as factors unrelated to the fundamental condition of the issuer, including general market, economic and political conditions. Different parts of a market, industry and sector may react differently to adverse issuer, market, regulatory, political, and economic developments.

Smaller Company Securities Risk. Securities of companies with smaller market capitalizations tend to be more volatile and less liquid than those of larger companies.

Foreign Investment Risk. Foreign investments may be subject to lower liquidity, greater price volatility and risks related to adverse political, regulatory, market or economic developments. Foreign investments may involve exposure to changes in foreign currency exchange rates and may be subject to higher withholding and other taxes.

Growth/Value Investing Risk. Securities that exhibit growth or value characteristics tend to perform differently and shift into and out of favor with investors depending on changes in market and economic sentiment and conditions.

Management Risk. Investment decisions, techniques, analyses or models implemented by a Fund's manager or sub-adviser in seeking to achieve the Fund's investment objective may not produce expected returns, may cause the Fund's shares to lose value or may cause the Fund to underperform other funds with similar investment objectives.

Performance

The following information provides some indication of the risks of investing in the Fund by showing changes in the Fund's performance from year to year. The Fund's average annual total returns are compared to the performance of one or more indices. Past performance before and after taxes is no guarantee of future results. Current month-end performance is available on the Fund's website at www.allspringglobal.com.

Calendar Year Total Returns for Class R6 as of 12/31 each year¹

Average Annual Total Returns for the periods ended 12/31/2023¹

	Inception Date of Share Class	1 Year	5 Year	10 Year
Class R6	6/28/2013	16.39%	11.72%	8.34%
Russell 3000® Index (reflects no deduction for fees, expenses, or taxes)		25.96%	15.16%	11.48%
Russell 2500™ Index (reflects no deduction for fees, expenses, or taxes)		17.42%	11.67%	8.36%

1. Historical performance shown for the Class R6 shares prior to their inception reflects the performance of the Institutional Class shares, and includes the higher expenses applicable to the Institutional Class shares. If these expenses had not been included, returns for the Class R6 shares would be higher.

Fund Management

Manager	Sub-Adviser	Portfolio Manager, Title / Managed Since
Allspring Funds Management, LLC	Allspring Global Investments, LLC	Christopher G. Miller, CFA , Portfolio Manager / 2017 Garth B. Newport, CFA , Portfolio Manager / 2020

Purchase and Sale of Fund Shares

Class R6 shares also are generally available only to retirement plans where plan level or omnibus accounts are held on the books of the Fund. Class R6 shares also are available to funds of funds including those managed by Allspring Funds Management. Class R6 shares generally are not available to retail accounts but may be offered through intermediaries for the accounts of their customers to certain institutional and fee-based investors, and in each case, only if a dealer agreement is in place with Allspring Funds Distributor, LLC to offer Class R6 shares.

Institutions Purchasing Fund Shares

Minimum Initial Investment

Class R6: Eligible investors are not subject to a minimum initial investment (intermediaries may require different minimum investment amounts)

Minimum Additional Investment

Class R6: None (intermediaries may require different minimum additional investment amounts)

Tax Information

By investing in a Fund through a tax-deferred retirement account, you will not be subject to tax on dividends and capital gains distributions from the Fund or the sale of Fund shares if those amounts remain in the tax-deferred account.

Distributions taken from retirement plan accounts generally are taxable as ordinary income. For special rules concerning tax-deferred retirement accounts, including applications, restrictions, tax advantages, and potential sales charge waivers, contact your investment professional. To determine if a retirement plan may be appropriate for you and to obtain further information, consult your tax adviser.
