Before you invest, you may want to review the Fund's prospectus, which contains more information about the Fund and its risks. You can find the Fund's prospectus, reports to shareholders and other information about the Fund online at allspringglobal.com/reports. You can also get information at no cost by calling 1-800-222-8222, or by sending an email request to fundliterature@allspring-global.com. The current prospectus ("Prospectus") and statement of additional information ("SAI"), dated August 1, 2024, as supplemented October 1, 2024, as supplemented from time to time, are incorporated by reference into this summary prospectus. The Fund's SAI may be obtained, free of charge, in the same manner as the Prospectus.

Investment Objective

The Fund seeks to replicate the total return of the S&P 500 Index, before fees and expenses.

Fees and Expenses

These tables are intended to help you understand the various costs and expenses you will pay if you buy, hold and sell shares of the Fund.

Shareholder Fees (fees paid directly from your investment)

| | |
|--|------|
| Maximum sales charge (load) imposed on purchases (as a percentage of offering price) | None |
| Maximum deferred sales charge (load) (as a percentage of offering price) | None |

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)¹

| | |
|---|--------------|
| Management Fees | 0.15% |
| Distribution (12b-1) Fees | 0.00% |
| Other Expenses | 0.25% |
| Total Annual Fund Operating Expenses | 0.40% |
| Fee Waivers | (0.15)% |
| Total Annual Fund Operating Expenses After Fee Waivers² | 0.25% |

- Expenses have been adjusted as necessary from amounts incurred during the Fund's most recent fiscal year to reflect current fees and expenses.
- The Manager has contractually committed through July 31, 2025, to waive fees and/or reimburse expenses to the extent necessary to cap Total Annual Fund Operating Expenses After Fee Waiver at 0.25% for Administrator Class. Brokerage commissions, stamp duty fees, interest, taxes, acquired fund fees and expenses (if any), and extraordinary expenses are excluded from the expense cap. Prior to or after the commitment expiration date, the cap may be increased or the commitment to maintain the cap may be terminated only with the approval of the Board of Trustees.

Example of Expenses

The example below is intended to help you compare the costs of investing in the Fund with the costs of investing in other funds. The example assumes a \$10,000 initial investment, 5% annual total return, and that fees and expenses remain the same as in the tables above. To the extent that the Manager is waiving fees or reimbursing expenses, the example assumes that such waiver or reimbursement will only be in place through the date noted above. Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

| After: | |
|----------|-------|
| 1 Year | \$23 |
| 3 Years | \$110 |
| 5 Years | \$206 |
| 10 Years | \$488 |

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 2% of the average value of its portfolio.

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 2%¹ of the average value of its portfolio.

1. The Fund changed its fiscal year-end from May 31 to March 31. The information shown for the Fund is for this shortened period.

Principal Investment Strategies

Under normal circumstances, we invest:

- at least 80% of the Fund’s net assets in a diversified portfolio of equity securities designed to replicate the holdings and weightings of the stocks comprising the S&P 500 Index.

We invest in substantially all of the common stocks comprising the S&P 500 Index and attempt to achieve at least a 95% correlation between the performance of the S&P 500 Index and the Fund’s investment results, before fees and expenses. This correlation is sought regardless of market conditions. If we are unable to achieve this correlation, then we will closely monitor the performance and composition of the S&P 500 Index and adjust the Fund’s securities holdings as necessary to seek the correlation. We may use futures contracts in order to equitize cash.

A precise duplication of the performance of the S&P 500 Index would mean that the net asset value (“NAV”) of Fund shares, including dividends and capital gains, would increase or decrease in exact proportion to changes in the S&P 500 Index. Such a 100% correlation is not feasible. Our ability to track the performance of the S&P 500 Index may be affected by, among other things, transaction costs and shareholder purchases and redemptions. We continuously monitor the performance and composition of the S&P 500 Index and adjust the Fund’s portfolio as necessary to reflect any changes to the S&P 500 Index and to maintain a 95% or better performance correlation before fees and expenses. The Fund may become non-diversified, as defined under the Investment Company Act of 1940, solely as a result of a change in relative market capitalization or index weighting of one or more constituents of the S&P 500 Index.

Principal Investment Risks

An investment in the Fund may lose money, is not a deposit of a bank or its affiliates, is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other governmental agency, and is primarily subject to the risks briefly summarized below.

Market Risk. The values of, and/or the income generated by, securities held by the Fund may decline due to general market conditions or other factors, including those directly involving the issuers of such securities. Securities markets are volatile and may decline significantly in response to adverse issuer, regulatory, political, or economic developments. Different sectors of the market and different security types may react differently to such developments.

Equity Securities Risk. The values of equity securities may experience periods of substantial price volatility and may decline significantly over short time periods. In general, the values of equity securities are more volatile than those of debt securities. Equity securities fluctuate in value and price in response to factors specific to the issuer of the security, such as management performance, financial condition, and market demand for the issuer’s products or services, as well as factors unrelated to the fundamental condition of the issuer, including general market, economic and political conditions. Different parts of a market, industry and sector may react differently to adverse issuer, market, regulatory, political, and economic developments.

Derivatives Risk. The use of derivatives, such as futures, options and swap agreements, can lead to losses, including those magnified by leverage, particularly when derivatives are used to enhance return rather than mitigate risk. Certain derivative instruments may be difficult to sell when the portfolio manager believes it would be appropriate to do so, or the other party to a derivative contract may be unwilling or unable to fulfill its contractual obligations.

Futures Contracts Risk. A Fund that uses futures contracts, which are a type of derivative, is subject to the risk of loss

caused by unanticipated market movements. In addition, there may at times be an imperfect correlation between the movement in the prices of futures contracts and the value of their underlying instruments or indexes, and there may at times not be a liquid secondary market for certain futures contracts.

Index Tracking Risk. A Fund may not achieve exact correlation between the performance of the Fund and the index it tracks due to factors such as transaction costs, shareholder purchases and redemptions and the timing of changes in the composition of the index. The Fund may invest in only a representative sample of the securities that comprise the index and may hold securities not included in the index, subjecting the Fund to increased tracking risk. Maintaining investments in securities regardless of market conditions or the investment merits of the securities in seeking to replicate an index's composition or performance could cause the Fund's returns to be lower than if the Fund employed an active strategy.

Management Risk. Investment decisions, techniques, analyses or models implemented by a Fund's manager or sub-adviser in seeking to achieve the Fund's investment objective may not produce expected returns, may cause the Fund's shares to lose value or may cause the Fund to underperform other funds with similar investment objectives.

Non-Diversification Risk. To closely track the composition of the Fund's target index, more than 25% of the Fund's total assets may be invested in issuers representing more than 5% of the Fund's total assets. In that case, the Fund would be non-diversified under the Investment Company Act of 1940, although it would continue to hold approximately 500 stocks across a number of sectors. When the Fund is operating as non-diversified, the Fund's performance may be hurt disproportionately by the poor performance of relatively few stocks, or even a single stock, and the Fund's shares may experience more significant fluctuations in value than if the Fund was diversified.

Performance

The following information provides some indication of the risks of investing in the Fund by showing changes in the Fund's performance from year to year. The Fund's average annual total returns are compared to the performance of one or more indices. The Fund's Regulatory Benchmark is a broad-based index that represents the overall securities markets relative to the Fund's asset category while the Fund's Strategy Benchmark is most closely aligned with the Fund's investment universe based on its investment strategy. Past performance before and after taxes is no guarantee of future results. Current month-end performance is available on the Fund's website at allspringglobal.com.

Calendar Year Total Returns for Administrator Class as of 12/31 each year

Average Annual Total Returns for the periods ended 12/31/2023

| | Inception Date of Share Class | 1 Year | 5 Year | 10 Year |
|--|-------------------------------|--------|--------|---------|
| Administrator Class (before taxes) | 2/14/1985 | 25.98% | 15.33% | 11.72% |
| Administrator Class (after taxes on distributions) | 2/14/1985 | 23.78% | 11.82% | 8.35% |
| Administrator Class (after taxes on distributions and the sale of Fund Shares) | 2/14/1985 | 16.87% | 11.69% | 8.70% |
| S&P 500 Index (Strategy and Regulatory Benchmark) (reflects no deduction for fees, expenses, or taxes) | | 26.29% | 15.69% | 12.03% |

After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state, local or foreign taxes. Actual after-tax returns depend on an investor's tax situation and may differ from those shown, and after-tax returns shown are not relevant to tax-exempt investors or investors who hold their Fund shares through tax-deferred arrangements, such as 401(k) Plans or Individual Retirement Accounts.

Fund Management

Purchase and Sale of Fund Shares

Administrator Class shares are generally available through intermediaries for the accounts of their customers and directly to institutional investors and individuals. Institutional investors may include corporations; private banks and trust companies; endowments and foundations; defined contribution, defined benefit and other employer sponsored retirement plans; institutional retirement plan platforms; insurance companies; registered investment advisor firms; bank trusts; 529 college savings plans; family offices; and funds of funds, including those managed by Allspring Funds Management, LLC. In general, you can buy or sell shares of the Fund online or by mail, phone or wire, on any day the New York Stock Exchange is open for regular trading. You also may buy and sell shares through a financial professional.

| Minimum Investments | To Buy or Sell Shares |
|---|--|
| Minimum Initial Investment Administrator Class: \$1 million (this amount may be reduced or eliminated for certain eligible investors) | Mail: Allspring Funds P.O. Box 219967 Kansas City, MO 64121-9967 Online: allspringglobal.com Phone or Wire: 1-800-222-8222 Contact your financial professional. |
| Minimum Additional Investment Administrator Class: None | |

Tax Information

Any distributions you receive from the Fund may be taxable as ordinary income or capital gains, except when your investment is in an IRA, 401(k) or other tax-advantaged investment plan. However, subsequent withdrawals from such a tax-advantaged investment plan may be subject to federal income tax. You should consult your tax adviser about your specific tax situation.

Payments to Intermediaries

If you purchase a Fund through an intermediary, the Fund and its related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the intermediary and your financial professional to recommend the Fund over another investment. Consult your financial professional or visit your intermediary's website for more information.
