Notes to financial statements

1. ORGANIZATION

Allspring Funds Trust (the “Trust”), a Delaware statutory trust organized on March 10, 1999, is an open-end management investment company registered under the Investment Company Act of 1940, as amended (the “1940 Act”). As an investment company, the Trust follows the accounting and reporting guidance in Financial Accounting Standards Board (“FASB”) Accounting Standards Codification Topic 946, Financial Services – Investment Companies. These financial statements report on the Allspring Treasury Plus Money Market Fund (the “Fund”) which is a diversified series of the Trust.

2. SIGNIFICANT ACCOUNTING POLICIES

The following significant accounting policies, which are consistently followed in the preparation of the financial statements of the Fund, are in conformity with U.S. generally accepted accounting principles (“GAAP”) which require management to make estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of income and expenses during the reporting period. Actual results could differ from those estimates.

Securities valuation

As permitted under Rule 2a-7 of the 1940 Act, portfolio securities are valued at amortized cost, which approximates fair value. The amortized cost method involves valuing a security at its cost, plus accretion of discount or minus amortization of premium over the period until maturity.

Investments which are not valued using the method discussed above are valued at their fair value, as determined in good faith by Allspring Funds Management, LLC (“Allspring Funds Management”), which was named the valuation designee by the Board of Trustees. As the valuation designee, Allspring Funds Management is responsible for day-to-day valuation activities for the Allspring Funds. In connection with these responsibilities, Allspring Funds Management has established a Valuation Committee and has delegated to it the authority to take any actions regarding the valuation of portfolio securities that the Valuation Committee deems necessary or appropriate, including determining the fair value of portfolio securities. On a quarterly basis, the Board of Trustees receives reports of valuation actions taken by the Valuation Committee. On at least an annual basis, the Board of Trustees receives an assessment of the adequacy and effectiveness of Allspring Funds Management’s process for determining the fair value of the portfolio of investments.

Repurchase agreements

The Fund may invest in repurchase agreements, under the terms of a Master Repurchase Agreement with selected financial institutions, and may participate in pooled repurchase agreement transactions with other funds advised by Allspring Funds Management. Repurchase agreements are agreements where the seller of a security to the Fund agrees to repurchase that security from the Fund at a mutually agreed upon time and price. The repurchase agreements must be fully collateralized based on values that are marked-to-market daily. The collateral may be held by an agent bank under a tri-party arrangement or a central counterparty, in the case of a centrally cleared repurchase agreement. In a centrally cleared repurchase agreement, immediately following execution of the repurchase agreement, the agreement is novated to the central counterparty and the Fund’s counterparty on the repurchase agreement becomes the central counterparty. Subject to the tri-party arrangement or centrally cleared repurchase agreement, the custodian will value the collateral daily and take action to obtain additional collateral as necessary to maintain a market value equal to or greater than the resale price. The repurchase agreements are collateralized by securities issued or guaranteed by the U.S. Government, its agencies or instrumentalities or certain money market instruments. Upon an event of counterparty default (including bankruptcy), under the terms of the Master Repurchase Agreement, both parties have the right to set-off. In case of centrally cleared repurchase agreements, depending on the event, the central counterparty or Fund will dispose the collateral to realize the amounts due. There could be potential loss to the Fund in the event that the Fund is delayed or prevented from exercising its rights to dispose of the collateral, including the risk of a possible decline in the value of the underlying obligations during the period in which the Fund seeks to assert its rights.

When-issued transactions

The Fund may purchase securities on a forward commitment or when-issued basis. The Fund records a when-issued transaction on the trade date and will segregate assets in an amount at least equal in value to the Fund’s commitment to purchase when-issued securities. Securities purchased on a when-issued basis are valued using amortized cost which approximates market value and the Fund begins earning interest on the settlement date. Losses may arise due to changes in the market value of the underlying securities or if the counterparty does not perform under the contract.

Security transactions and income recognition

Securities transactions are recorded on a trade date basis. Realized gains or losses are recorded on the basis of identified cost.

Interest income is accrued daily and bond discounts are accreted and premiums are amortized daily. To the extent debt obligations are placed on non-accrual status, any related interest income may be reduced by writing off interest receivables when the collection of all or a portion of interest has been determined to be doubtful based on consistently applied procedures and the fair value has decreased. If the issuer subsequently resumes interest payments or when the collectability of interest is reasonably assured, the debt obligation is removed from non-accrual status.

Interest earned on cash balances held at the custodian is recorded as interest income.

Distributions to shareholders

Distributions to shareholders from net investment income are declared daily and paid monthly. Distributions from net realized gains, if any, are recorded on the ex-dividend date and paid at least annually. Such distributions are determined in accordance with income tax regulations and may differ from U.S. GAAP. Dividend sources are estimated at the time of declaration. The tax character of distributions is determined as of the Fund's fiscal year end. Therefore, a portion of the Fund's distributions made prior to the Fund's fiscal year end may be categorized as a tax return of capital at year end.

Federal and other taxes

The Fund intends to continue to qualify as a regulated investment company by distributing substantially all of its investment company taxable income and any net realized capital gains (after reduction for capital loss carryforwards) sufficient to relieve it from all, or substantially all, federal income taxes. Accordingly, no provision for federal income taxes was required.

The Fund's income and federal excise tax returns and all financial records supporting those returns for the are subject to examination by the federal and Delaware revenue authorities. Management has analyzed the Fund's tax positions taken on federal, state, and foreign tax returns, as applicable, for all open tax years and does not believe that there are any uncertain tax positions that require recognition of a tax liability.

As of January 31, 2025, the cost of investments for federal income tax purposes is substantially the same as for financial reporting purposes.

As of January 31, 2025, the Fund had capital loss carryforwards which consist of \$24,590 in short-term capital losses.

Class allocations

The separate classes of shares offered by the Fund differ principally in shareholder servicing and administration fees. Class specific expenses are charged directly to that share class. Investment income, common fund-level expenses, and realized gains (losses) on investments are allocated daily to each class of shares based on the relative proportion of net assets of each class.

3. FAIR VALUATION MEASUREMENTS

Fair value measurements of investments are determined within a framework that has established a fair value hierarchy based upon the various data inputs utilized in determining the value of the Fund's investments. The three-level hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). The Fund's investments are classified within the fair value hierarchy based on the lowest level of input that is significant to the fair value measurement. The inputs are summarized into three broad levels as follows:

- Level 1—quoted prices in active markets for identical securities
- Level 2—other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.)
- Level 3—significant unobservable inputs (including the Fund's own assumptions in determining the fair value of investments)

The inputs or methodologies used for valuing investments in securities are not necessarily an indication of the risk associated with investing in those securities.

The following is a summary of the inputs used in valuing the Fund's assets and liabilities as of January 31, 2025:

	QUOTED PRICES (LEVEL 1)	OTHER SIGNIFICANT OBSERVABLE INPUTS (LEVEL 2)	SIGNIFICANT UNOBSERVABLE INPUTS (LEVEL 3)	TOTAL
Assets				
Investments in:				
Repurchase agreements	\$0	\$16,331,085,975	\$0	\$16,331,085,975
U.S. Treasury securities	0	15,504,260,604	0	15,504,260,604
Total assets	\$0	\$31,835,346,579	\$0	\$31,835,346,579

Additional sector, industry or geographic detail, if any, is included in the Portfolio of investments.

At January 31, 2025, the Fund did not have any transfers into/out of Level 3.

6. CREDIT RISK

The Fund may place its cash on deposit with financial institutions in the United States, which are insured by the Federal Deposit Insurance Company (“FDIC”) up to \$250,000. The Fund’s credit risk in the event of failure of these financial institutions is represented by the difference between the FDIC limit and the total amounts on deposit. The Fund from time to time may have amounts on deposit in excess of the insured limits.

7. INDEMNIFICATION

Under the Fund’s organizational documents, the officers and Trustees have been granted certain indemnification rights against certain liabilities that may arise out of performance of their duties to the Fund. The Fund has entered into a separate agreement with each Trustee that converts indemnification rights currently existing under the Fund’s organizational documents into contractual rights that cannot be changed in the future without the consent of the Trustee. Additionally, in the normal course of business, the Fund may enter into contracts with service providers that contain a variety of indemnification clauses. The Fund’s maximum exposure under these arrangements is dependent on future claims that may be made against the Fund and, therefore, cannot be estimated.

8. OPERATING SEGMENTS

The Fund has adopted FASB Accounting Standards Update 2023-07, *Segment Reporting (Topic 280) - Improvements to Reportable Segment Disclosures* (“ASU 2023-07”). Adoption of the standard impacted financial statement disclosures only and did not affect the Fund’s financial position or the results of its operations. An operating segment is defined in Topic 280 as a component of a public entity that engages in business activities from which it may recognize revenues and incur expenses, has operating results that are regularly reviewed by the public entity’s chief operating decision maker (“CODM”) to make decisions about resources to be allocated to the segment and assess its performance, and has discrete financial information available. The President of the Fund acts as the Fund’s CODM. For the periods presented, the Fund operated as a single operating segment. The CODM monitors the operating results of the Fund as a whole and the Fund’s long-term strategic asset allocation from which it derives its revenue is determined as outlined in the Fund’s prospectus which is executed by the Fund’s portfolio management team. The portfolio composition, total return and expense ratios, and the components of total increase/decrease in net assets are used by the CODM to assess the segment’s performance and to make resource allocation decisions for the Fund’s single segment. This information is consistent with that presented within the Fund’s financial statements. Segment assets are reflected on the accompanying Statement of assets and liabilities as “total assets” and significant segment revenue and expenses are listed on the accompanying Statement of operations.
