What is the product?

Type: This product is a Société d'Investissement à Capital Variable (SICAV).

Term: The fund has been established for an indefinite period of time. The PRIIP Manufacturer reserves the right to liquidate the fund, subject to approval by the Board of Directors.

Objectives: The fund seeks long-term capital appreciation while preserving capital in down markets, by investing at least two-thirds of its total assets in equity securities of companies located worldwide. The fund employs a strategy of gaining long and short exposure in equity securities of issuers in developed markets (i.e., countries included in the MSCI World Index). The fund will gain “long” exposure to equity securities (including through participatory notes, swaps, convertible securities, equity linked notes and/or certificates) that it believes will outperform the equity market on a risk-adjusted basis, and will gain “short” exposure to equity securities that it believes will underperform the equity market on a risk-adjusted basis. The fund uses a quantitative investment process which evaluates multiple fundamental, statistical, and technical characteristics covering stock valuation, growth, return history, risk, liquidity and economic sensitivity. The fund may also gain exposure to equity securities by investing in ADRs, CDRs, EDRs, GDRs, IDRs and similar depository receipts as well as equities denominated in US Dollars issued by Non-US Issuers. The fund may have long equity exposure of up to 100% of its net assets. “Short” exposure is achieved through the use of total return swaps (on eligible financial indices with first class financial institutions and baskets of eligible securities)/contracts for difference and other types of derivatives. The fund may have a short equity exposure of up to 50% of its assets. The fund’s long-short exposure will vary over time based on its assessments of market conditions and other factors, and it may increase its short equity exposure when it believes that market conditions are particularly favourable for a short strategy, such as during periods of heightened volatility in the global equity markets, or when the market is considered to be overvalued. The fund may invest in the equity securities of companies of any market capitalisation. The fund will invest in no fewer than three countries, which may include the United States, and may invest more than 25% of its total assets in any one country. The fund may also use futures, forward contracts, options, or swap agreements, as well as other derivatives, for hedging or efficient portfolio management purposes. The fund is actively managed but uses the MSCI World Index as a reference for selecting investments and a composite of 50% of the MSCI World Index plus 50% of the ICE BofA US 3-Month Treasury Bill Index for calculating the performance fee and for performance comparison. The investments of the fund may deviate significantly from the components of and their respective weightings in the benchmarks. You may redeem your investment upon demand on each business day when banks in Luxembourg are open for normal business and the New York Stock Exchange is open for trading (a “Business Day”). This share class does not distribute dividends. Income is reinvested in the fund.

Intended Investor:

This product is suitable for institutional investors of all knowledge and/or experience levels seeking long-term capital appreciation while preserving capital in adverse markets, who have an investment horizon of 5 years or longer and who have a risk tolerance compatible with the product’s SRI rating.

Depository: Brown Brothers Harriman (Luxembourg) S.C.A.

Further Information: This document describes a share class of a sub-fund of Allspring (Lux) Worldwide Fund. The assets and liabilities of each sub-fund are segregated and no sub-fund is responsible for the liabilities of another. The prospectus and financial reports are prepared for Allspring (Lux) Worldwide Fund as a whole. You may obtain free copies of these documents in English, French, and German from Allspring (Lux) Worldwide Fund, c/o Brown Brothers Harriman (Luxembourg) S.C.A., 80 Route d’Esch, L-1470 Luxembourg or at allspringglobal.com.

Price Publication: Net asset value per share is calculated on each Business Day and is available in local media and/or with the fund’s local agent in certain countries and at the registered office of the fund.

WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

Risk indicator

< Lower risk Higher risk >>

The risk indicator assumes you keep the product for a minimum of 5 years.

1	2	3	4	5	6	7
---	---	---	---	---	---	---

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as class 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level, and poor market conditions could impact the capacity of the fund to pay you.

Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Performance scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product / a suitable benchmark over the last 10 years. Markets could develop very differently in the future.

Recommended minimum holding period: 5 Years

Investment: 10 000 EUR

Scenarios		1 Year	5 Years
Minimum: There is no minimum guaranteed return. You could lose some or all of your investment.		(recommended holding period)

What happens if Allspring Global Investments Luxembourg S.A. is unable to pay out?

The value of your investment would not be affected by a default by the PRIIP Manufacturer. The value of your investment is not guaranteed but you will not face financial loss greater than the amount of your investment.

What are the costs?

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and should show you the impact that all costs will have on your investment over time.

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods:

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.

- EUR 10 000 is invested.

Investment: 10 000 EUR	If you exit after 1 Year	If you exit after 5 Years
Total Costs	141 EUR	794 EUR
Annual Cost Impact	1.41 %	1.44 %

This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 3.19% before costs and 1.75% after costs.
